

Become a Volunteer  
with Vernon's Newest Radio Station!

Join us on our path to become the best community radio station in Canada!

## Computer, Technology, and IT Team

Do you love computers and other technology, especially sound engineering and radio broadcasting?

Do you love trouble shooting glitches and breakages in information, software, and hardware? Do you get excited when setting up new technology, software, and devices?

Be a part of 97.9 Valley FM as we do something magical and meaningful right from scratch and build a station that is to become the best community radio station in Canada.

Training as needed will be provided. Team members will stay to know our equipment and needs as we continue to build our studio and our station. Team members support each other and train new members as needed.
